

Jordan Lee

Software Engineer • jordan.lee.dev@email.com • (555) 019-2837 • Newark, NJ

Summary

Backend-focused software engineer with 5 years of experience building REST APIs and cloud-deployed services. Comfortable across Python, Java, and AWS infrastructure.

Experience

Senior Software Engineer — Brightpath Systems, Jersey City, NJ

June 2022 – Present

- Built and maintained microservices in Python (Flask) and Java (Spring Boot) serving 2M+ requests/day
- Migrated legacy batch jobs to AWS Lambda, reducing processing cost by 34%
- Mentored 2 junior engineers and led weekly code reviews

Software Engineer — Alden Data Co., New York, NY

August 2019 – May 2022

- Developed internal tooling in Python for data pipeline monitoring
- Implemented CI/CD pipelines using Jenkins and Docker
- Worked directly with product team to scope and ship 3 major feature releases

Junior Developer — Alden Data Co., New York, NY

July 2018 – August 2019

- Supported QA automation using Selenium and pytest
- Fixed production bugs and maintained internal documentation

Education

B.S. Computer Science — Rutgers University, New Brunswick, NJ

Graduated May 2018

Skills

Python, Java, Flask, Spring Boot, AWS (Lambda, EC2, S3), Docker, Jenkins, PostgreSQL, REST APIs, Git, Selenium, pytest
